

Strengths and Challenges of Occupational Therapy Telehealth Services

Hello!

My name is Ashley Ko and I am an occupational therapy student from West Coast University. I am conducting a research study for my doctoral capstone experience to evaluate the strengths and challenges of telehealth service delivery to children with sensory processing impairments amongst occupational therapy practitioners.

The title of my research study is: "Strengths and Challenges of Occupational Therapy Telehealth Services". Please consider volunteering to complete this online survey (link below) if you meet the following criteria:

1. licensed occupational therapist or occupational therapy assistant in California, USA, and
2. delivering services via telehealth to children from 0-18 years old with sensory processing impairments.

Please note that additional questions may appear upon selecting your answers. This survey will take approximately 15 minutes to complete and must be **completed by May 23, 2021**.

Thank you so much for participating and please feel free to share the survey link with peers. For questions/concerns related to the study, please email the principal investigator, Aaron Picus, at apicus@westcoastuniversity.edu or the student investigator, Ashley Ko, at ako9@u.westcoastuniversity.edu.

Thank you so much!

Sincerely,

Ashley Ko
Occupational Therapy Doctorate Student
